409 D St. NE, Washington, DC 20002

PROFESSIONAL

Summer 2022 Lecturer, Kyiv School of Economics and Duke University

Virtual

- Taught empirical techniques and methods of data classification to map, model, and predict conflict.

2021 – Present Planning Officer, U.S. 7th Fleet Future Plans

Newport, RI

- Formulated and evaluated all emergency, mobilization, contingency, and war plans for United States Seventh Fleet in the Western Pacific. Focusing on future challenges and wargaming at Naval War College. TS/SCI.

2018 – 2021 Master Instructor, Economics, United States Naval Academy

Annapolis, MD

- Applies game and network theory to evaluate strategic coalitions and conflict in the context of trade, finance, development, environmental factors, and conflict indicators to improve U.S. foreign and geo-economic policy. Current research focuses on private information about type and strategic decisions across networks in high innovation industries and conflict. Has significant work in data classification using principal component analysis and other econometric methods. Teaches university courses in macroeconomics, econometrics and statistics, as well as logic and rhetoric. Currently designing a graduate course in game theory and geopolitics.

2018 – 2020 Economist, The World Bank

Washington, DC

- Worked on the Blue Economy Project, advising small developing nations on managing their coastal resources and debt loads while improving competitiveness, income per capita, and reducing environmental impact. I compiled and analyzed country economic indicators and data to develop new policy proposals to grow economies.

2017 – 2019 Speechwriter, United States Naval Academy

Annapolis, MD

- Wrote congressional testimony, articles, and policy speeches for the Superintendent of the United States Naval Academy for his engagements with senior U.S. government officials, foreign heads of state, and policy conferences. Responsible for developing the content for speeches, outlining current and future naval strategies at sea, in space, and in cyberspace.

2014– 2017 Strike Fighter Pilot, United States Navy

Atsugi, Japan

- Served for 3 years as a forward-deployed F/A-18F Super Hornet pilot in the Indo-Pacific region. Completed 4 carrier deployments and multiple shore detachments, providing air support to U.S. naval and land forces via intercepts and combat air patrols. Conducted intelligence-gathering missions on foreign adversaries and illicit sea traffic around the Philippines, Indonesia, Vietnam, and terraformed military installations on South China Sea shoals and reefs. Provided armed overwatch in the Sea of Japan and the Yellow Sea, near-shore to both China and North Korea during heightened tensions in 2017. Accumulated over 1000 flight hours developing new integrated fighter tactics with the USAF and allied forces, including 6 major military exercises.

2011 – 2014 Student, F/A-18 Pilot Pipeline, United States Navy

Multiple Duty Stations

- Student Naval Aviator (Pilot). Graduated first-in-class in F/A-18 Super Hornet training, ranked first in air-to-air combat, air-to-ground attack, and overall. Excelled in close air support of special ground forces, completed Priority-A carrier qualification for both day and night, and deployed directly from flight training to a frontline squadron.
